a
Proposed test
About 2 g of seed
40 requests of 0.05 g
1 successful addition
39 rejected additions
Actual total: 0.05 g
b
Later public account
Treated as a dose test
Large dose said to be ineffective
Claim retained in:
- later notes
- scientific account
- retrospective review
No completed 2 g test
c
Contrasting response
Rejection recognized
Another agent records the failed additional seed calls and limits subsequent dosing
An execution failure need not become negative evidence
