

**a** Electrochemistry: recommendation performance

Mean score: 0.543 to 0.706  
Optimization improves 26/30 paired retests

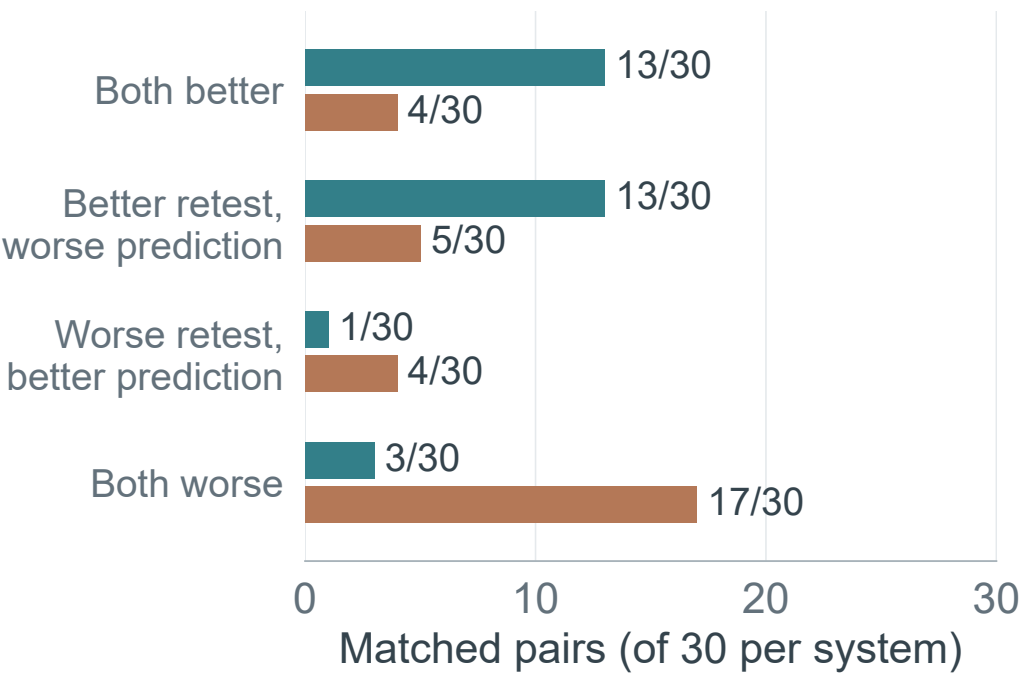

**b** Electrochemistry: prediction error

Mean MAE: 0.1430 to 0.1431  
Optimization improves 14/30 paired forecasts

**c** Joint outcomes of the two commissions

Electrochemistry    Reaction processing

**d** Discordance across electrochemical worlds

Better retest, worse prediction: 13/30 pairs
