

A One vessel contains seven agent-selected primitive operations

cell-01 · opaque · world seed 0 · descriptive example only

B Campaign receipt preserves units and denominators

closure 6 vessels · 6 closed · 6 final assays · 0 discards

actions 69 operation attempts · 17 non-final measurements

stocks 0.24 mol reagent · 0.48 L solvent

physical 2.763 cost · 39.0 h · 2.63 mL sample

trajectory-event alignment verified · immutable receipt hashes bound

C Identity, resources and replay remain external controls

The ledger is not prompt context; it is the auditable measurement spine

D Closure and failure accounting are explicit

closed lifecycles **60 / 60**

final assays **60**

invalid or rejected **0**

right-censored **0**

815 accepted operations · 164 non-final measurements
repeated events, not independent sample units
