

Endpoint behavior differs across prior conditions, but current belief signals are not diagnostic

Aligned – opaque Misindexed – opaque Completed Failed; retained

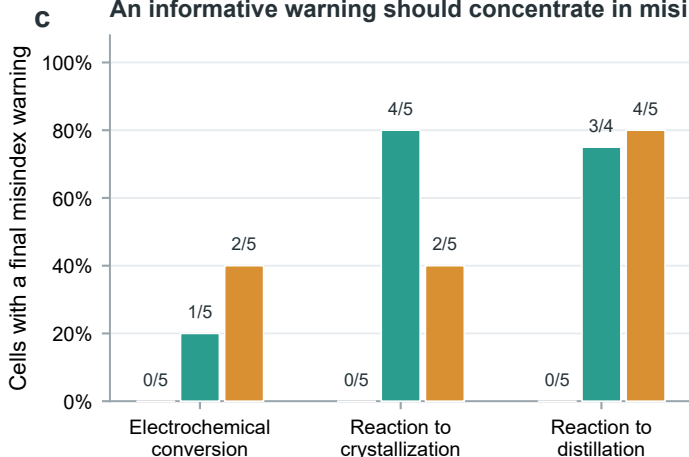

Task-dependent endpoint contrasts
Paired world seeds; horizontal marks = means

Heterogeneous reliability updates
Positive = larger change in aligned arm

Misindex warnings lack specificity
An informative warning should concentrate in misindexed cells

Retained development matrix
44/45 cells; 176/180 experiments; 44/45 replay
